

## OPOZIVI RETRACTIONS

### Opoziv objavljenog članka

DOI: 10.5937/vojtehg1204237R

Redakcija Vojnotehničkog glasnika povlači članak autora Dragana S. Pamučara i Bobana D. Đorovića pod nazivom Primena DEA metodologije u procesu kontrole i merenja kvaliteta mreže linija javnog gradskog prevoza putnika (engl. DEA model for measuring the quality control of public transport networks), koji je objavljen u Vojnotehničkom glasniku, Vol. 60, No. 2/2012, pp. 28–47. Rad se povlači jer je isti članak, pod nazivom Application of mathematical programming techniques for measuring the efficiency of companies in the manufacturing and service sector, prihvaćen za objavljivanje i objavljen u časopisu Metalurgia internacional, Vol. 17, No. 5, pp. 113–120. Do propusta je došlo pošto su autori rad poslali u oba časopisa istovremeno, a zatim je u oba rad prihvaćen za objavljivanje i objavljen.

Autori su se složili sa opozivom rada i izrazili su žaljenje.

Redakcija *Vojnotehničkog glasnika* izvinjava se zbog nastale greške.

### Withdrawal of the published article

The editorial board of the *Military Technical Courier* withdraws the article by the authors Dragan S. Pamucar and Boban D. Djorovic entitled *DEA model for measuring the quality control of public transport networks*, which was published in the *Military Technical courier*, Vol. 60, No. 2/2012, pp. 28–47. The article is being retracted because of the fact that the same article entitled *Application of mathematical programming techniques for measuring the efficiency of companies in the manufacturing and service sector* has been accepted for publication and published in the journal *Metalurgia internacional*, Vol. 17, No. 5, pp. 113–120. The authors submitted the manuscript for publication in both journals at the same time.

Both authors agreed that the their article should be withdrawn from publication.

The editorial board of the *Military Technical Courier* apologize for the inconvenience.
