

Integration implementation vector of the national economic interests of Ukraine: theoretical and practical backgrounds aspects

ANDRII HRYSHCHENKO *

ABSTRACT. In the article there was considered the appropriateness of optimal combining of Ukraine's economy transparency and policy of economic protectionism for the purpose of its national interest's defense. There were offered the actions concerning the improvement of foreign economic activity of Ukraine, analyzed the influence factors on the up-grade of the structure of domestic export and systematized the tasks which should be solved by the government in the integration process of Ukraine to the world economy. There have been developed the conceptual principles of integration implementation vector of Ukraine and determined the risks. There were studied the issues of necessity of coordinated international governments' actions for the development of the world economy and the role of the countries of "Group of Twenty (G20)" in this process given current challenges of globalization and their national interests. There was generated the author's opinion of institutional determination of the category "national interest" on the legislative level.

KEY WORDS: transparent economy, economic protectionism, national interest, Group of Twenty (G20), international coordination, foreign economic activity, liberalization, integration vector, conceptual principles.

* **Hryshchenko A.A.** – PhD of Economic Sciences, Associate Professor of the Department of International Economy of State Higher Education Establishment (SHEE) "Kyiv National Economic University named after Vadym Hetman." Scientific interests: research of the formation of current paradigm of the world economic development, globalization and regionalization.
