ABSTRACT

The present study is to investigate the evaluation of content analysis via library portals in order to identify main content elements which are present a substantial extent. Today's they are using Web technologies to promote their services, present their collections to satisfy users' needs. General information elements (100.00%) of NLSU, WBNUJS & HNLU are available followed by 71.42% service offered 83.33% book and journals details about collections followed by 83.33% Circulation Service, e-resources, publication services, 83.33% CD ROM Search Service & social Network sites and etc.

KEYWORDS: Evaluation of Web Sites, Content Analysis, Website Portals, Website Analysis, Law Universities Website, National Law University Library Web sites

INTRODUCTION

Content analysis is a research method which allows the qualitative consists of tabulating the occurrences of content units "systematically and reliably so that generalizations can be made from them in relation to the categories of interest to the researcher (Haggarty, 1996). Indeed, content analysis was born as a quantitative technique. (Harold D. Lasswell, Lerner, and de Sola Pool 1952) the father founders of the technique put it in these words: "There is clearly no reason for content analysis unless the question one wants to be answered is quantitative." The original source can be printed publications, broadcast programs, other recordings, the internet, or live situations, spoken or visual communication. It provides a quantitative description. Many content analyses involve media - print newspapers, magazines, television, video, movies, the Internet. Texts can be defined broadly as books, book chapters, essays, interviews, discussions, newspaper headlines and articles, historical documents, speeches, conversations, advertising, theater, informal conversation, or really any occurrence of communicative language. Waples and Berelson (1941: "Systematic content analysis attempts to define more casual descriptions of the content, so as to show objectively the nature and relative strength of the stimuli applied to the reader or listener."

Objectives of the Study

The study aims to analyse the content of library portals of National Law Universities in India the study has been under made following objectives

- To identify the library portals includes collections, academic & general information
- To study and analyze the homepage contents and contact details of library portals of National Law Universities.
- To know the various kinds of information resources and services offered by the National Law Universities in India
- To know the Information about social Network sites offered by the National Law Universities in India

Scope and Limitations of the Study

This study is limited to the library portals in National Law, University libraries in India. The websites that were retrievable with the help of search engines only were considered. Researchers have taken only 06 University library portals of India. The study focused on the analysis of the content of University library portals of India. For the present study, the following National Law Universities have been selected on the basis of the convenience of the researcher. (Table 1)

Methodology

The researcher has utilized Internet Explorer to search and retrieve the contents from National Law University library portals. These Universities are selected on the basis of their reputation, quality of education offered and also on the popularity. Library portals evaluate indicates like 1 for Yes, N for No & Y for Yes, simple percentage and the chi-square test was used. Using MS-EXCEL2007 Version, tabulation, analysis, and interpretation. Then, the information was classified, tabulated and inferences were drawn.

SUGGESTIONS

A majority of National Law, University library websites are updated frequently, hence it is good to update frequently, NLIU library has not given a link to their library website; it could be more effective and useful to users if libraries are going to make a link to the website. Only five National Law university libraries in their website given a link to suggest/recommend books by users of the library collection, to make a good collection, all libraries should make a link on their website to recommend books by users. Library websites should focus attention to make regular updating to have new arrivals and announcements/upcoming event information. Library services are very essential so all National Law, University Libraries update to time to time is better to library effective services
