John Dewey (October 20, 1859 – June 1, 1952) was an American philosopher, psychologist, and educational reformer whose ideas have been influential in education and social reform. Dewey is one of the primary figures associated with philosophy of pragmatism and is considered one of the founders of functional psychology. A well-known public intellectual, he was also a major voice of progressive education and liberalism. Although Dewey is known best for his publications about education, he also wrote about many other topics, including epistemology, metaphysics, aesthetics, art, logic, social theory, and ethics.

John Dewey graduated from the University of Vermont and spent three years as a high school teacher in Oil City, Pennsylvania. He then spent a year studying under the guidance of G. Stanley Hall at John Hopkins University in America's first psychology lab. After earning his Ph.D. from John Hopkins, Dewey went on to teach at the University of Michigan for nearly a decade.

In 1894, Dewey accepted a position as the chairman of the department of philosophy, psychology and pedagogy at the University of Chicago. It was at the University of Chicago that Dewey began to formalize his views that would contribute so heavily to the school of thought known as pragmatism. The central tenant of pragmatism is that the value, truth or meaning of an idea lies in its practical consequences. Dewey also helped establish the University of Chicago Laboratory Schools, where he was able to directly his apply his pedagogical theories.

Dewey eventually left the University of Chicago and became a professor of philosophy at Columbia University from 1904 until his retirement in 1930. In 1905, he became President of the American Psychological Association.
