

“Joining hands in fighting against Oral Cancer & Giving hopes to sufferers”

April is the National Oral Cancer Awareness month, a time when dental community rallies together to fight against a serious disease. Public awareness about this serious disease and its risk factors is crucial to saving lives and dentists are in unique position to perform head and neck exams and oral screenings which can help to identify abnormalities in mouth at earliest stage, on the same note Seema Dental College & Hospital organized a series of events at the Institute and throughout the Rishikesh to increase Awareness of Oral Cancer & Rehabilitation among the society in collaboration with Indian Prosthodontic Society & Indian Dental Association. **Dr. Himanshu Aeran, Director Principal, Seema Dental College & Hospital, Rishikesh** told that Oral cancer forms the most common group of head and neck cancers and with high prevalence of habits like tobacco, the incidence of Oral cancer is highly raised in the Indian subcontinent. Prevention & early diagnosis are the keys to reduce the mortality associated with Oral cancer. If diagnosed early, oral cancer has an 80- 90% survival rate. Rehabilitation of the sufferers is another issue to improve their quality of life. It is high time that we all should get involved in such awareness programs for the community in hopes to raise oral cancer Awareness and Rehabilitation of sufferer, thus making a difference in the world of oral cancer.
