STURGEON (*ACIPENSERIDAE* BONAPARTE, 1831). THEMATIC ENGLISH LANGUAGE BIBLIOGRAPHY

M. Simon, seemann.sm@gmail.com, Institute of Fisheries NAAS, Kyiv

Purpose. Forming a thematic bibliographic list of English-language publications on certain issues of vital activity of sturgeon (*Acipenseridae*), both in natural conditions and in aquaculture. Particular attention was given to species that are not common in aquaculture of Ukraine.

Methods. The complete and selective methods were applied in the process of the systematic search. The bibliographic core was made up of literary sources from electronic archives of world-renowned specialized scientific journals. In particular: *Journal of Applied Ichthyology*, *Environmental Biology of Fishes*, *Conservation Biology*, *Lake and Reservoir Management*, *Estuaries*, *Freshwater Fisheries*, *Aquaculture*, *North American Journal of Fisheries Management*, *Canadian Journal of Fisheries and Aquatic Sciences*, *Copeia* & others.

Results. A thematic list of main publications including thematic scientific collections, materials of international scientific and practical conferences, scientific articles and abstracts of dissertations was composed. It consists of 187 English-language papers. Presented publications cover the time interval for the last thirty years. The literary sources are arranged in alphabetical order by author or title, and described according to DSTU 8302:2015 "Information and documentation. Bibliographic reference. General principles and rules of composition", with the amendments (code UKND 01.140.40), as well as in accordance with the requirements of APA style – international standard of references.

Practical value. The prepared list may be useful for scientists, practitioners, students, whose sphere of interests is related to issues of questions breeding sturgeon in aquaculture and conservation of populations of rare species of fish.

Key words: sturgeon (*Acipenseridae*), aquaculture, *Acipenser baeri*, *A. brevirostrum*, *A. debryanus*, *A. fulvescens*, *A. gueldenstaedti*, *A. medirostris*, *A. mikadoi*, *A. naccarii*, *A. oxyrhynchus*, *A. persicus*, *A. ruthenus*, *A. schrenckii*, *A. sinensis*, *A. stellatus*, *A. sturio*, *A. transmontanus*, *Huso dauricus*, *Huso huso*.

РИБИ РОДИНИ ОСЕТРОВИХ (*ACIPENSERIDAE* BONAPARTE, 1831). ТЕМАТИЧНА АНГЛОМОВНА БІБЛІОГРАФІЯ

M. Ю. Симон, seemann.sm@gmail.com, Інститут рибного господарства НААН
України, м. Київ

Мета. Формування довідкового бібліографічного переліку англомовних публікацій з питань особливостей життєдіяльності риб з родини осетрових (*Acipenseridae*) як в природних умовах, так і в аквакультури. Особливу увагу приділено видам, які не є поширеними в аквакультури України.

Методика. У процесі підготовки тематичного списку, в ході системного пошуку було застосовано цілісний та вибірковий методи. Бібліографічне ядро складало літературні джерела з електронних архівів всесвітньовідомих спеціалізованих наукових журналів зокрема: «*Journal of Applied Ichthyology*», «*Environmental Biology of Fishes*», «*Conservation Biology*», «*Lake and Reservoir Management*», «*Estuaries*», «*Freshwater Fisheries*», «*Aquaculture*», «*North American Journal of Fisheries Management*», «*Copeia*» та ін.

© M. Simon, 2019

Результати. Сформовано тематичний бібліографічний перелік основних робіт: тематичних наукових збірників, матеріалів міжнародних науково-практичних конференцій, наукових статей і авторефератів дисертацій. Він налічує 187 англомовних джерел. Представлені публікації охоплюють часовий інтервал за останні тридцять років. Літературні джерела розміщені у алфавітному порядку за автором чи назвою, описані згідно з ДСТУ 8302:2015 «Інформація та документація. Бібліографічне посилання. Загальні положення та правила складання», із урахуванням поправок (код УКНД 01.140.40), а також відповідно до вимог оформлення списку літератури за міжнародним стандартом APA style.

Практична значимість. Підготовлений перелік може бути корисним для науковців, практиків, студентів, сфера інтересів яких стосується питань розведення осетрових риб в аквакультури, а також збереження популяцій зникаючих видів риб.

Ключові слова: осетрові (*Acipenseridae*), аквакультура, *Acipenser baeri*, *A. brevirostrum*, *A. debryanus*, *A. fulvescens*, *A. gueldenstaedti*, *A. medirostris*, *A. mikadoi*, *A. naccarii*, *A. oxyrhynchus*, *A. persicus*, *A. ruthenus*, *A. schrenckii*, *A. sinensis*, *A. stellatus*, *A. sturio*, *A. transmontanus*, *Huso dauricus*, *H. huso*.

РЫБЫ СЕМЕЙСТВА ОСЕТРОВЫХ (*ACIPENSERIDAE* BONAPARTE, 1831). ТЕМАТИЧЕСКАЯ АНГЛОЯЗЫЧНАЯ БИБЛИОГРАФИЯ

М. Ю. Симон, seemann.sm@gmail.com, Институт рыбного хозяйства НААН
Украины, г. Киев

Цель. Формирование справочного библиографического перечня англоязычных публикаций по вопросам особенностей жизнедеятельности рыб семейства осетровых (*Acipenseridae*) как в природных условиях, так и в аквакультуре. Особенное внимание уделено нераспространенным в аквакультуре Украины видам.

Методика. В процессе подготовки тематического списка, в ходе системного поиска были применены целостный и выборочный методы. Библиографическое ядро составляли литературные источники из электронных архивов всемирно известных специализированных научных журналов, в частности: «*Journal of Applied Ichthyology*», «*Environmental Biology of Fishes*», «*Conservation Biology*», «*Lake and Reservoir Management*», «*Estuaries*», «*Freshwater Fisheries*», «*Aquaculture*», «*North American Journal of Fisheries Management*», «*Copeia*» и др.

Результаты. Сформирован тематический библиографический перечень основных работ: тематических научных сборников, материалов международных научно-практических конференций, научных статей и авторефератов диссертаций. Он насчитывает 187 англоязычных источников. Представленные публикации охватывают временной интервал за последние тридцать лет. Литературные источники размещены в алфавитном порядке по автору или названию, описаны по ГОСТ 8302:2015 «Информация и документація. Библиографические ссылки. Общие положения и правила составления», с учетом поправок (код УКНД 01.140.40), а также в соответствии с требованиями оформления списка литературы по международному стандарту APA style.

Практическая значимость. Подготовленный перечень может быть полезным для ученых, практиков, студентов, сфера интересов которых касается вопросов разведения осетровых рыб в аквакультуре, а также сохранения популяций редких видов рыб.

Ключевые слова: осетровые (*Acipenseridae*), аквакультура, *Acipenser baeri*, *A. brevirostrum*, *A. debryanus*, *A. fulvescens*, *A. gueldenstaedti*, *A. medirostris*, *A. mikadoi*, *A. naccarii*, *A. oxyrhynchus*, *A. persicus*, *A. ruthenus*, *A. schrenckii*, *A. sinensis*, *A. stellatus*, *A. sturio*, *A. transmontanus*, *Huso dauricus*, *H. huso*.
